

Electromagnets and the Acoustic Piano:

A Brief Overview of Current Research and
Music for the Genre

Jonathan Taylor de Oliveira

jtolive@bgsu.edu

Introduction

- ▶ Why electromagnets and piano?
 - ▶ Once Upon a Time...
 - ▶ John Cage - Prepared Piano
- ▶ The acoustic sound world of the piano is AMAZING!
- ▶ Introduction to electromagnets
- ▶ Three main researchers
 - ▶ Per Bloland
 - ▶ Andrew McPherson
 - ▶ Eduardo Miranda

The Electromagnet and the Piano

- ▶ Not so young after all...
- ▶ Richard Eisenmann
 - ▶ *Elektronisches Klavier*
 - ▶ 1886 - Electromagnets used to activate piano strings
- ▶ Alvin Lucier (b. 1931)
 - ▶ [*Music on a Long Thin Wire* \(1977\)](#)
 - ▶ [*Music for Piano with Magnetic Strings* \(1995\)](#)
- ▶ Peter Adriaansz (b. 1966)
 - ▶ [*Waves: four pieces for E-bow piano, sines and live-delay* \(2007\)](#)

Image 1 - Horseshoe Electromagnet

Image 2 - EBow

Recent use of electromagnets for piano

Image 3 - Setups by Per Bloland, Andrew McPherson, and Eduardo Miranda, respectively

Per Bloland

- ▶ Master of Music degree - University of Texas at Austin
 - ▶ Kevin Puts
 - ▶ Russel Pinkston
 - ▶ Bruce Pennycook.
- ▶ D.M.A. in composition - Stanford University
 - ▶ Mark Applebaum
 - ▶ Brian Ferneyhough
 - ▶ Chris Chafe
 - ▶ Erik Ulman.
- ▶ Music has been performed at
 - ▶ SEAMUS, Darmstadt, and Bowling Green New Music Festival.
- ▶ Assistant Professor of Composition and Technology - Miami University, OH

Electromagnetically-Prepared Piano (EMPP)

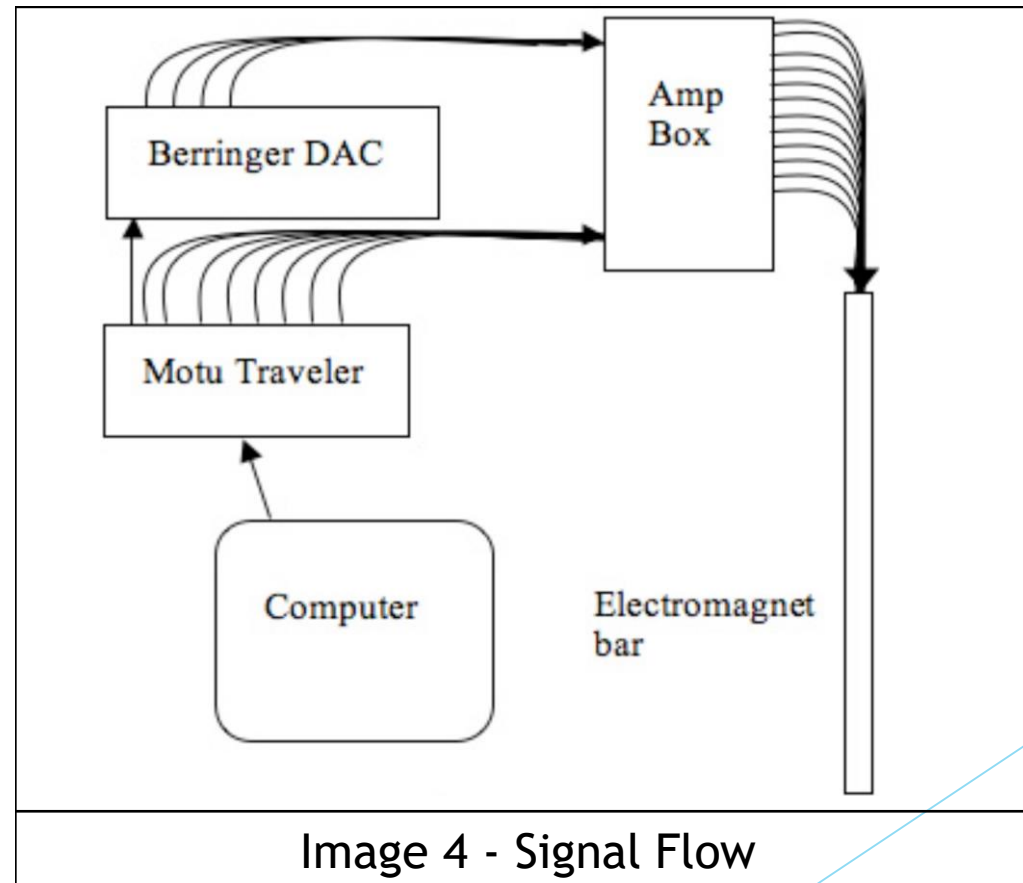

- ▶ Design developed with Edgar Berdahl, Steven Backer and Julius O. Smith III
 - ▶ Twelve electromagnets positioned over strings

- ▶ Dual function

- ▶ Filter

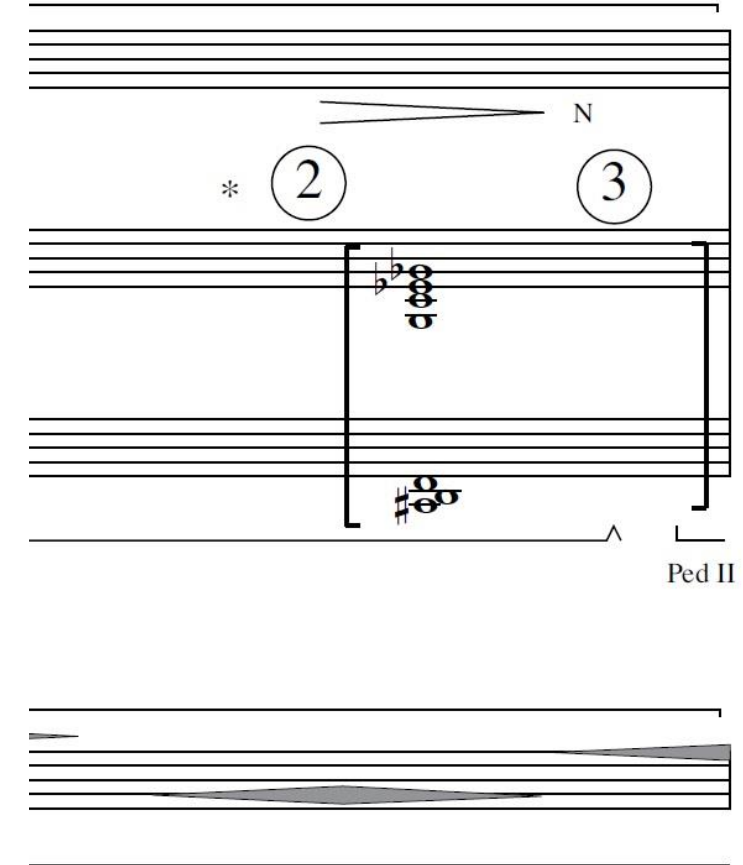

- ▶ [Single Sine Wave](#) at A4
 - ▶ [Single Sawtooth](#) at A4
 - ▶ Gershwin's *Rhapsody in Blue*
 - ▶ [Undampened](#)
 - ▶ [Dampened](#)

- ▶ “Loudspeaker”

Elsewhere is a Negative Mirror (2005)

- ▶ Digital signal controlled by Max/MSP
- ▶ Complex routine
 - ▶ First pedal (damper)
 - ▶ Sustaining the notes played by the pianist
 - ▶ Raising the dampers
 - ▶ The second pedal (sostenuto)
 - ▶ Silently depressed chords, activated by electromagnets
 - ▶ The third pedal (una corda)
 - ▶ Trigger the patches on the computer.
- ▶ [Elsewhere is a Negative Mirror \(2005\)](#)

The image shows a musical score for piano. It features several staves. The top staff has a treble clef and a key signature of one flat. There are two circled numbers, 2 and 3, with an asterisk to the left of number 2. A vertical line with a double bar at the top and bottom spans across the middle staves, indicating a section. Below the staves, there are markings for 'Ped II' and 'Ped III'. A note 'N' is written above the top staff. The bottom staff has a treble clef and a key signature of one flat. There are some markings on the bottom staff, including a sharp sign and some letters.

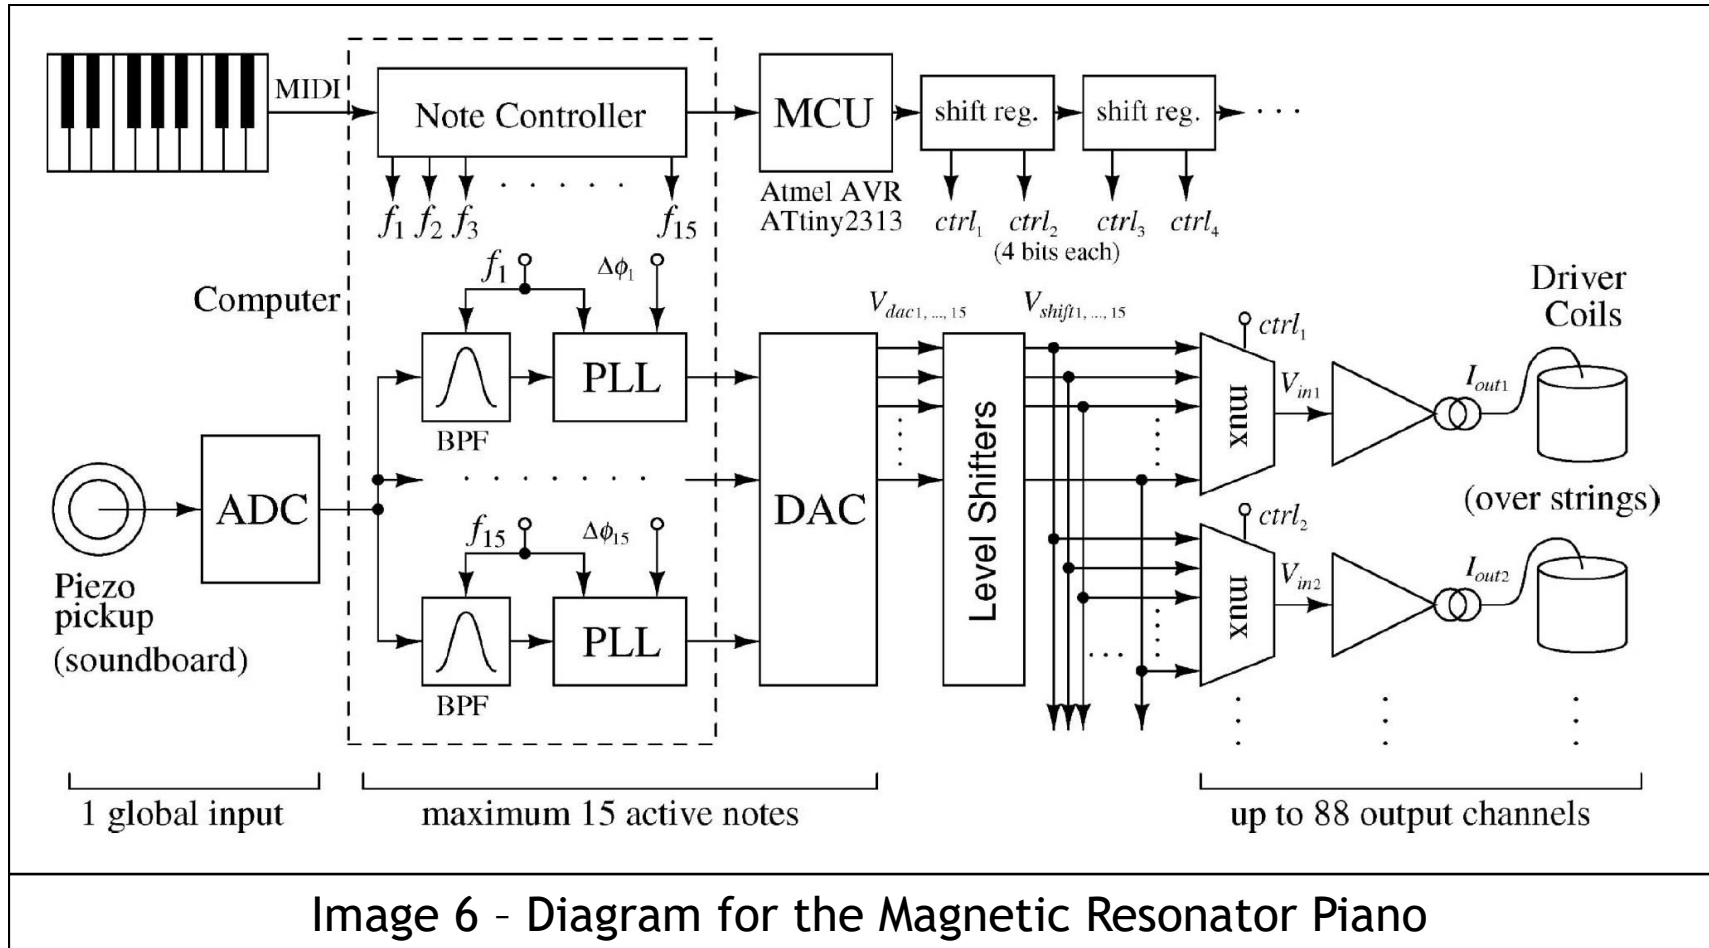

* Note that the order of operations here is crucial:
1 - depress and release Ped III, triggering cue 2
2 - silently depress chord
3 - after electronics have died away, trigger cue 3
4 - release ped I
5 - engage pedal II to catch notes of chord

Image 5 - *Elsewhere is a Negative Mirror*, page 1

Andrew McPherson

- ▶ Double major at MIT
 - ▶ Music
 - ▶ Viola with Marcus Thompson
 - ▶ Composition with Peter Child and John Harbison
 - ▶ Electrical engineering
- ▶ Master's Degree in engineering - MIT
- ▶ Ph.D. in composition - University of Pennsylvania
 - ▶ James Primosch, Jay Reise, Anna Weesner, and Maurice Wright
- ▶ Now Lecturer in Digital Media at Queen Mary, University of London

Magnetic Resonator Piano

- Performer's control of the electromagnets
[MIDI keyboard \(Secrets of Antikythera - 2009\)](#) or [Piano Bar sensor](#)

Eduardo Reck Miranda

- ▶ Data-processing technology/composition - Universidade do Vale do Rio dos Sinos
- ▶ Philosophy at the Universidade Federal do Rio Grande do Sul
- ▶ Master of Science degree in Music Technology - University of York
- ▶ Ph.D. in Music and Artificial Intelligence - University of Edinburgh.

BioComputer Music

► [BioComputer Music](#)

Conclusion

- ▶ Differences in design stem from difference in purpose
- ▶ The EBow possibility of continuous sound
- ▶ Electromagnetically-Prepared Piano
 - ▶ Piano strings as filters and loudspeaker
- ▶ Magnetic Resonator Piano - augmented texture, timbre and technique
- ▶ BioComputer Music
 - ▶ Similarities to Bloland's and McPherson's designs, but...
 - ▶ "Give a voice" is given to biological events
